Acknowledgements	XIII
List of Abbreviations	XV

## Part One: Medical and scientific view

1	Clinical experience with PID and ICSI <i>Ingeborg Liebaers, K. Sermon, C. Staessen, H. Joris, W. Lissens, E. Van Assche, P. Nagy, M. Bonduelle, M. Vandervorst, P. Devroey, A. Van Steirteghem</i>	3
2	The various micromanipulative procedures: State of the art, chances, and risks <i>Dieter Meschede and Jürgen Horst</i>	17
3	The relation between ICSI and genetic diagnosis from an ethical point of view <i>Barbara Maier</i>	23
4	Modification of IVF application and access to IVF services by PID? <i>Brian A. Lieberman</i>	33
5	Examples for possible PID indications – scientific background and reflections on effects <i>Ulrike A. Mau</i>	37

6	Should there be a uniform list of genetic diseases allowing access to PID? <i>Hansjakob Müller</i>	47
7	Nuclear transplantation - medical and ethical aspects <i>Gerd Richter and Matthew D. Bacchetta</i>	55

## **Part Two: Personal interests and moral implications**

1	Ethics of preimplantation genetic diagnosis <i>Guido de Wert</i>	75
2	Preimplantation diagnosis. A reflection in light of a personalist ethics <i>Paul Schotsmans</i>	97
3	Ethical aspects of germline gene therapy <i>Alexandre Mauron</i>	107
4	'Quality control' in reproduction – what can it mean, what should it mean? <i>Dieter Birnbacher</i>	119
5	Does gene therapy have ethically problematic effects on identity? <i>Ingmar Persson</i>	127

## **Part Three: Moral rights and duties**

1	Does PID solve the moral problems of prenatal diagnosis? A rights analysis <i>Deryck Beyleveld</i>	135
2	Ethics of Research on Human Embryos <i>Reiner Wimmer</i>	141
3	Categorical arguments – Pro life versus pro choice? <i>Maureen Junker-Kenny</i>	147
4	Selection through prenatal diagnosis and preimplantation diagnosis <i>Hille Haker</i>	157

## **Part Four: Social concepts and moral implications**

1	Eugenics comes back with medically assisted procreation <i>Bernard Sèle and Jacques Testart</i>	169
2	Germline gene 'therapy': Public opinions with regard to eugenics <i>Sigrid Graumann</i>	175
3	Predictive genetic medicine – a new concept of disease <i>Lene Koch</i>	185

4	Animal Models: an anthropologist considers Dolly <i>Sarah Franklin</i>	197
5	Issues surrounding preimplantation diagnosis and germline gene therapy <i>Alexandre Quintanilha</i>	209
6	Beside the point – reflections on passivity <i>Paul J.M. van Tongeren</i>	213

## **Part Five: Choices and decision making**

1	What claims can be based on the desire for a healthy child? Towards an ethics of 'informed desires' <i>Walter Lesch</i>	223
2	The European Alliance of Genetic Support Groups <i>Ysbrand Poortman</i>	235
3	Some reflections on the use of the term 'prevention' in reproductive medicine <i>Elisabeth Hildt</i>	243
4	Preimplantation diagnosis – implications for genetic counselling <i>Ruth Chadwick</i>	251

## **Part Six: Health care, justice and regulation**

1	Legal regulations concerning preimplantation diagnosis <i>Jennifer Gunning</i>	261
2	Reproductive technology and the slippery slope argument: A message in Blood <i>Tony McGleenan</i>	273
3	Measuring the benefits of IVF <i>Emma McIntosh and Mandy Ryan</i>	285
4	Justice and preimplantation diagnosis <i>Joke de Witte</i>	293
5	The role of ethics codes in medicine – how can they be helpful in making decisions? <i>Stella Reiter-Theil</i>	299
